

ADITYA RAJ

Machine Learning Engineer

+91-96928 74640 | adityaraj90500@gmail.com | Aurangabad, Bihar, India

<https://www.linkedin.com/in/aditya1617>

PROFESSIONAL SUMMARY

Machine Learning Engineer with hands-on experience building NLP pipelines, speech-processing systems, and real-time fraud detection platforms. Skilled in Python, scikit-learn, Sql, with a strong foundation in predictive modeling and deep learning. Seeking an ML Engineer internship or role to build and deploy scalable, production-grade AI solutions.

TECHNICAL SKILLS

- **Languages:** Python, SQL, C
- **ML/DL Frameworks:** , Scikit-learn, Pandas, NumPy, MLP
- **NLP & AI:** NLP, RAG, LLMs, Generative AI, Agentic AI
- **Visualization:** Matplotlib, Seaborn/
- **Tools & Platforms:** Git, GitHub, Google Colab, Jupyter Notebook, vscode

PROJECTS

Medical Diagnosis with Machine Learning | Python, PyTorch, Scikit-learn, FastAPI, Docker

- Built an end-to-end diagnostic prediction pipeline processing clinical patient data, integrating data cleaning, median/KNN imputation for missing vitals, and automated disease risk stratification.
- Trained and benchmarked classification models (XGBoost, Random Forest, Multi-Layer Perceptrons), optimizing for Recall, Specificity, and ROC-AUC to minimize false-negative clinical diagnoses on imbalanced datasets.
- Integrated model interpretability tools (SHAP, LIME) to generate feature importance summaries, providing clear diagnostic rationales based on key physiological biomarkers.
- Deployed a production-ready REST API using FastAPI containerized with Docker, enabling real-time risk assessment and low-latency diagnostic score generation for clinical decision support.

WORK EXPERIENCE

Python ML Intern — FinAnalyz Technologies Pvt. Ltd.

Jan 2026 – Apr 2026

- Developed scalable machine learning solutions for fintech applications, focused on regional-language processing and automated voice systems.
- Engineered a vernacular voice bot using SarvamAI and OpenAI Whisper for accurate speech-to-text, validating API endpoints using Postman and Base64 encoding.
- Implemented and fine-tuned a T5 decoder model to optimize text-to-speech data pipelines and improve natural language understanding for local Indian dialects.
- Collaborated on Python-based financial analytics modules while maintaining strict adherence to data confidentiality and secure coding standards.

EDUCATION & CERTIFICATIONS

- **Bachelor of Technology, CSE (AI/ML)** — Bengal College of Engineering and Technology, MAKAUT, West Bengal | 2023 – 2027
- **Intermediate** — Ram lakhan singh yadav College (RLSY College), Aurangabad, Bihar | 2023
- **Matriculation** — st.ignatius school, Aurangabad, Bihar | 2021
