PROFESSIONAL SUMMARY

Machine learning with hands-on experience building NLP pipelines, real world datasets ML projects with its metric assessment, LLM-powered applications, and real time football analysis. Skilled in Python, TensorFlow, PyTorch, and Transformers, with a strong and guiding foundation in deep learning, Natural Language Processing(NLP), Retrieval-Augmented Generation (RAG), and predictive modeling. Seeking an ML Engineer / AI Engineer internship or role to build and deploy scalable, production-grade AI and LLM-based solutions.

TECHNICAL SKILLS

- **Languages:** Python, C
- **ML/DL Frameworks:** TensorFlow, PyTorch, Keras, Scikit-learn, Ensemble Learning, NLTK, Pandas, NumPy
- **NLP & AI:** NLP, Transformers, Hugging Face, LLMs, Generative AI, Agentic AI
- **Visualization:** Matplotlib, Seaborn
- **Tools & Platforms:** Git, GitHub, Docker, kubernetes, Anaconda, FastAPI, Flask, REST APIs

PROJECTS

Real world Football analysis | Python, YOLO (Ultralytics), Scikit-learn, Numpy

- Built an end-to-end football analytics pipeline that ingests raw match footage/event data, processes it through computer vision (player/ball detection and tracking) and statistical models to generate actionable performance insights.
- Engineered player and ball tracking using YOLO/OpenCV, achieving frame-by-frame position extraction and converting pixel coordinates to real-world pitch coordinates and analyzing player movement, direction and its speed.
- Developed advanced performance metrics (possession percentage, player speed, distance covered, pass accuracy, heatmaps) by combining tracking data, enabling data-driven tactical insights.
- Deployed an interactive dashboard visualizing player movements, team formations, and match statistics in real time, making the system usable by coaches/analysts without technical expertise.

WORK EXPERIENCE

Python ML Intern — FinAnalyz Technologies Pvt. Ltd.

Jan 2026 – Apr 2026

- Performed data preprocessing on real-world financial datasets, including missing-value treatment, data cleaning, encoding, and feature engineering.
- Conducted Exploratory Data Analysis (EDA) using Python to identify patterns, distributions, correlations, and trends in financial data.
- Developed model-ready data pipelines to transform raw datasets into structured and reliable inputs for machine learning workflows.
- Performed data validation and quality checks to identify inconsistencies, outliers, and data anomalies, improving the reliability and usability of datasets for downstream ML tasks.

EDUCATION & CERTIFICATIONS

- **Bachelor of Technology, CSE (AI/ML)** — Bengal College of Engineering and Technology, MAKAUT, West Bengal | 2023 – 2027
- **Intermediate** — JPV DAV public school, Pureni, Katni | 2023
- **Matriculation** — JPV DAV public school, Pureni, Katni | 2021
- **Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp** — Udemy, Completion Certificate
